## **BACKGROUND**

The Statewide Water Quality Control Policy on the Use of Coastal and Estuarine Waters for Power Plant Cooling (Once-Through Cooling Policy or OTC Policy) requires that the SACCWIS convenes periodically to ensure that implementation of the OTC Policy will not cause disruption in the State of California's electrical power supply. All meetings of the SACCWIS are open to the public.

The meeting will include a presentation and the Committee's consideration of approval of the Draft SACCWIS Report, which does not recommend any power plant final compliance date extensions at this time. The meeting will also include a presentation from the Los Angeles Department of Water and Power on the status of their facilities' compliance with the OTC Policy and milestones for compliance through 2029.
